

For generations, people have believed in the Chinese myth known as the Dark Legend. It occurs sometime in the 11th or 12th century when China plunges into a state of total anarchy, when power-hungry warlords rebel against the central government. To regain control over his empire, the emperor devises a cunning plan.

He prepares for the ultimate conquest for his most ambitious rivals, a challenge that no warlord is able to resist as the rewards are unimaginable. The victor will be endowed with incredible abilities and possess ultimate power, not to mention unlimited wealth. The triumph is absolute as defeat means death.

Thousands of fearless warriors battle among themselves with special fighting abilities.
